T2-OPP-CreAltiva-Studio

Prioritized Features

High

● **Automatic Appointment Scheduling**

The system must automatically schedule appointments based on available dates and times, avoiding overlapping bookings. This ensures better organization and a smoother experience for clients and staff.

● **Appointment reminders and alerts for important dates**

The system should automatically send notifications or reminders to clients and staff before upcoming appointments or events to reduce no-shows and improve punctuality.

● **Record payments made and pending**

The system must keep a detailed record of all payments—both completed and pending—to maintain accurate financial tracking and ensure no transaction is missed.

Medium

● **Maintain a history of contracted services and payments made**

The system should store and display a history of all contracted services and payments, allowing easy access to past transactions for future reference or customer service.

● **Generate payment and order status reports**

The system should automatically create detailed reports about payments and order statuses, helping the business monitor financial performance and manage operations efficiently.

● **Reports on appointments, clients, payments, and orders for internal analysis**

The system will generate analytical reports to provide insights into appointment trends, client activity, payment behavior, and order fulfillment, supporting decision-making and internal evaluations.

Low

● Visual calendar interface for appointments and events

The system should display all appointments and events in a visual calendar view, allowing users to easily see their schedules and available time slots.

● Generation of photographic equipment details

The system will include a section for recording and displaying details of photographic equipment, such as cameras and accessories, to keep an organized inventory of tools and resources.
